

You may store the velcro by either pressing it against the square velcro pieces

or...rolling it in a large oval under your hatband.

Alu-Marine Corporation  
Islamorada, Florida

#### FlyLine Tamer

- Eliminates tangles
- Adds casting distance
- Permits more fishing time because you never put your rod away

#### Other Products by Alu-Marine Corporation

##### Casting Platform

- Remote control light
- Rubber top.

##### Pro-Trim Bimini Material

- Replaces canvas tops
- Guaranteed to last 10 years

Just like the hat, Pro-Trim material repels the heat.

## SunTamer Hat™

*No other hat comes close!!!*

*SunTamer Mask*

- High Speed Windstrap. Simply adjust velcro strap under chin
- 100% UV Protection. Lab Tested. Canvas provides much less
- Repels heat - unlike canvas Pro-Trim vinyl does not absorb heat
- Waterproof - super in the rain. Even your glasses stay dry
- Dark Green under brim enhances vision
- One size fits all - adjustable headband. Removable for washing
- Patented air circulation ring - prevents heat build-up
- SunTamer Mask - press fits onto velcro windstrap
- Floats

Wind Control Options:  
Mild Wind – use leather chinstrap only.

High Wind – use velcro windstrap only.

In extremely high wind applications your leather Chinstrap can be secured over the velcro and then looped onto the provided clip. The Chinstrap may be twirled to shorten it or, new knots may be tied to shorten the Chinstrap.

## SunTamer Mask

High Speed

1. Mask pressed onto velcro.
2. Leather chinstrap secured over mask.
3. Mask may be tucked into shirt.

Very High Speed  
Same as above but also: Secure leather strap loop to clip on front top of brim.

**\* IMPORTANT – The greater the wind the tighter the velcro needs to be fit.**

Hot, Muggy...  
No Wind...  
Press fit mask to velcro without securing at chin

The Leather Chinstrap should be kept stretched over the rear topside of the brim when not in use.
